La psychologie de Marcel Sembat: le «violon d’Ingres» d’un homme politique?*

Jacqueline Carroy

Summary

The socialist politician Marcel Sembat’s unpublished manuscripts reveal the unexpected figure of a diarist with a passion for his own intimate, bodily, sexual and affective economy, and of an autodidact and sometimes polemical reader of psychology (for instance Pierre Janet’s). Sembat was recognized nonetheless as a potentially publishable author by Georges Dumas, the editor of the Journal de psychologie normale et pathologique, who asked him to contribute an article – which was never published – on dreaming. Sembat was also particularly receptive to Freud’s early conceptions of sexuality. Was Marcel Sembat an amateur, like the painter Ingres playing the violin? Could he be characterized as a “psychologist from below”? As a dilettante? Or simply as a cultivated man according to the meaning this period ascribed to the term?

Keywords: Hobby of a Politician?, Scientific Diarism, Psychological Hobby, Sexuality, Dreaming, Janet, Freud

* Le présent travail n’aurait pas été possible si je n’avais pu consulter les manuscrits de Sembat à l’Office universitaire de recherche socialiste (OURS) que je tiens à remercier. Merci également à Madame Delphine Marignan Pommier de m’avoir fait connaître l’inventaire de la bibliothèque de Marcel Sembat et de m’avoir indiqué les ouvrages qui étaient dédicacés ou annotés.
